## AMERICANA

### EXTREMELY RARE DAGUERRETYPE OF FINANCIER JOHN MURRAY FORBES

\* 474

**JOHN MURRAY FORBES** (1813-1898). Railroad executive; Businessman; Public servant. Having accumulated a substantial fortune by 1846, Forbes turned his considerable talents to railroad construction and financings. He was the prime mover in purchasing and completing the unfinished Michigan Central RR, and constructing the roads which formed the nucleus of the Chicago, Burlington & Quincy RR, of which he became president in the late 1870s. Always public-spirited citizen, Forbes made certain that the railroads in which he had an interest displayed a character and stability which significantly distinguished them from most of the other railroads of the day. His civic involvement began at the start of the Civil War, when he helped put the state of Massachusetts prepare for war, and he was instrumental in organizing the state's black regiments. In 1863, he was sent to England to block construction of, or to purchase, the so-called Laird rams that we being built there for the Confederacy. Throughout the war, his advice was constantly sought by all branches of government. A longtime member of the national executive committee of the Republican party, he broke with the party upon its nomination of James Blaine for the presidency in 1884.

An extremely rare 1/2 plate daguerreotype of a seated John Murray Forbes reading a newspaper. This image is very similar to one shown in the "Time Life" book "The Railroaders" and was in all probability done at the same time as this one. A very rare image. \$3,000 - up

In Paris he became a liberal in religion and an advanced republican in politics. In England he published various radical essays, including *Advice to the Privileged Orders* (1792), proscribed by the British government. In 1792 he was made a French citizen. Thomas Paine had become his friend in England, and during Paine's imprisonment in Paris Barlow effected the publication of *The Age of Reason*. In 1795-97 he was sent to Algiers to secure a release of U.S. prisoners and to negotiate treaties with Tripoli, Algiers, and Tunis. He returned to the United States in 1805 and lived near Washington, D.C., until 1811, when he became U.S. plenipotentiary to France. The term "Roulette" is derived from a French word meaning small wheel. The origin of Roulette is not very clear. While some sources state that Blaise Pascal, a 17th Century French mathematician invented the roulette wheel, other sources state that the game originated in China and was brought to Europe by Dominican monks who were trading with the Chinese. During the late 18th century the Roulette wheel became very popular when Prince Charles (ruler of Monaco at the time) introduced gambling to Monaco as a way of alleviating the financial problems of the region. However, the modern version of the Roulette wheel did not appear until 1842 when Frenchmen Francois and Louis Blanc invented the single "0" roulette game. The game was eventually brought to America in the early 1800s. However, the single "0" modification was rejected in America and the two zeros "00" were returned to the Roulette wheel. The Roulette wheel gained a great deal of popularity in America during the California Gold Rush.

A tract of land was purchased from the Native Americans in 1754, and preparations were made for development. Aid was sought in England and Eliphalet Dyer was sent in an unsuccessful attempt to secure confirmation of the land grant. Colonization from Connecticut was first attempted in 1762-63, but it was 1769 before any definite settlement was made. Upon federal settlement of state accounts, Connecticut received enough federal stock to pay its remaining debts, (i.e. to redeem the Imlay certificates). The United States stock issued to the state was not initially transferable on the books of the Treasury, and

until this was changed, the state held the stock in Trust for its creditors and issued them state warrants, of which this is one, transferring the interest that the stock received." ### GERMAN CONCENTRATION CAMP MONEY

\* 634

A Complete Set of January 1, 1943 Notes from the Concentration Camp at Theresienstadt (part of the former Czechoslovakia), all Gem Crisp Uncirculated. Includes a 1 Krone and 2, 5, 10, 20, 50, and 100 Kronen notes, each a different color, all featuring an engraved vignette of Moses holding the Ten Commandments on the obverse. Campbell Nos. 4111-4117, a complete set of all known denominations. Theresienstadt was established as a "proposed model ghetto", to impress foreign visitors and the Red Cross. According to Campbell, Theresienstadt was nothing more than a transit point to the death camps in Poland. The denomination of these notes is meaningless, because a Krone(n) was not in use in either Germany or Czechoslovakia; therefore, the notes had value only within the confines of Theresienstadt. Each of these notes bears, on the reverse, a printed signature of Jakob Edelstein as "Der Alteste der Juden" (Elder of the Jews). An historical reminder of one of the darkest times in the history of man. (7 notes)

1946, Massachusetts. Stock certificate for 3 shares of the Narragansett Times, Inc. Black/Gold. Vignette of an eagle at upper left corner. Litho. Issued to and signed on verso by **JOHN F. KENNEDY** (1917-1963). Thirty-fifth President. Kennedy, the son of the prominent banker Joseph Kennedy, first gained acclaim for his book *Why England Slept*. In World War II, he commanded the PT-109, which was sunk by a Japanese destroyer. He was first elected to Congress in 1946 and elected to the Senate in 1952, where he wrote *Profiles In Courage*. He narrowly defeated Richard Nixon for the Presidency in 1960.

This is the first and only stock certificate we've had or seen of JFK owning or signing any stock or bond. In fact, his high profile in government office would have made it highly unlikely that he held shares in corporations from his becoming a political figure until his death. The certificate is currently in a frame with photocopies displaying the verso with JFK's signature and transfer information. Additionally a letter from is provided detailing the ownership of the certificate from a descendent of the newspaper's owner who was a close friend of Kennedy's until his death, having met the latter during the war. Kennedy bought 20 shares of common stock of the newspaper for a total of \$2,000 in 1946 and agreed to serve as the corporation's vice-president, a position he relinquished after assuming his position in the House of Representatives.

A complete letter detailing the circumstances of Kennedy's ownership and investment in the Narragansett Times from the newspaper owner's descendent accompanies the certificate, a copy of which can be provided to interested bidders. A unique certificate and a truly rare opportunity to acquire JFK on a stock certificate. Couple of folds. Not cancelled but fully transferred on verso. Extremely Fine. \$7,500 - up

developer. Wade was one of the founders of the American commercial telegraph system, a system which was instrumental in the "opening" of the West, and in the industrial development of this country. Starting with a small telegraph line between Detroit to Jackson in 1847, Wade quickly developed other lines. By 1856, after numerous consolidations, Wade was made the general agent of the Western Union Telegraph Company. By 1862, Wade had expanded to the west coast, thereby putting out of business the firm operating the pony express and preparing the way for the transcontinental railroad. mint tooth paste, at top center. With many of the elements of a classic stock scam, this company was formed in Atlantic City, NJ ostensibly to manufacture and sell toothpaste. All certificates were signed by W. W. Wrigley, and investors began buying the stock mistakenly believing it to be associated with W. W. Wrigley of chewing gum fame. Spearmint toothpaste, of course, seemed to be a natural follow-up product to spearmint chewing gum. Wrigley and his pharmaceutical company were charged with fraud and closed down. Uncancelled. Minor edge tear lightly affecting border, otherwise very fine. \$100 - up

**DUESENBERG AUTOMOBILE & MOTORS CO., INC.**

\* 672  
1923, Stock certificate. Orange/Black. Nice vignette of a seated figure and two globes. Litho. From the turn of the century, Fred Duesenberg (1876-1932) had been well known as a designer of fast, powerful, reliable gasoline engines which came to be widely used in the marine, automotive and aviation industries. From 1903-1913 Duesenberg was the chief engineer of the Mason Motor Car Company. In 1913, Fred and his brother August (1878-1955) established the Duesenberg Motor Company to manufacture gasoline engines of their own design. Success was immediate, with Mulford and Rickenbacker consistently driving Duesenberg-powered racers to commanding victories. In 1920, the brothers began building their first production car, the Model A. While the car created a sensation at its debut, it was a mere shadow of the massive and extraordinarily expensive Model J (and later SJ and SSJ) which was introduced in 1928. Of the Duesenberg marque it has been said, "If but one of all the automobiles ever built in America had to be singled out as the most glorious achievement in this country's automotive history, that car would have to be the Duesenberg. It transcended the ordinary in full measure, created legends in its wake which will live forever, and became a literal metaphor — 'It's a Duesy' — for anything unrelentingly superlative." Uncancelled and Excellent condition. \$600 – up

The end of the American Civil War in April 1865 found many citizens of England and the European countries holding vast quantities of bonds issued by the Confederate States of America. When the U.S. Government refused to redeem these bonds, overseas holders of Confederate bonds formed a Confederate Bondholders association in England to lobby the U.S. Government for redemption of the bonds. **AN EXTREMELY EARLY AMERICAN RAILROAD BOND ISSUED BY THE LOCKPORT AND NIAGARA FALLS RAIL-ROAD COMPANY**

\* 782  
1838, New York. \$1,000 bond bearing 7% interest. Blue. The development of rail transportation in Niagara County began in the 19th century with the Strap Railroad between Lockport and Niagara Falls. Chartered in 1834 by a group of Lockport and Niagara Falls businessmen petitioned for a charter for the Lockport and Niagara Falls railroad and they were successful. This soon became the first strap railroad in operation in the area. They were called strap railroad because a strap of iron topped the wooden rails. The cars at first were drawn along the rails by horses when the line opened in April of 1837. But before years end, steam locomotives had replaced the horses. This ranks as one of the earliest railroad bonds we've had. A fine early American railroad bond. Uncancelled and Extremely Fine. \$750 - up

**AN EXTREMELY EARLY NEW YORK AND HARLEM RAIL-ROAD COMPANY STOCK**

\* 783  
1837, New York. Stock certificate for 7 shares. Black with ornate left border design. The company received its charter in 1831 for a line to run from 23rd Street to the northern tip of Manhattan. At that time, 23rd Street was too far north for most people, so the charter was changed to start the line at Prince Street. By 1852, the line reached 131 miles north to Chatham where it connected with the Boston & Albany line (when the new Grand Central was built, this mileage would change to 127). In 1862 it was bought by Commodore Vanderbilt and became a part of his empire that would include the Hudson River Railroad and the original New York Central railroad. Accompanied by a stock transfer document and a probate document indicating that the shares were of the ownership of Susan Wallace, deceased. The certificate which was attached to the transfer with wax has separated at upper left and thus the upper left corner is torn away but remains on the transfer document. An extremely rare and early stock certificate related to this important pioneer American railroad. \$300 - up
